Dear Hiring Manager,

I am writing to express my strong interest in a position related to Software Testing within your organization. I recently graduated with a Bachelor's degree in Business and Information Technology, and I am passionate about starting my professional journey in the field of Software Testing, where I can contribute meaningfully while continuously building my skills.

During my time at Amalitech GmbH, I gained practical experience in writing code and implementing software tests. This hands-on exposure greatly deepened my understanding of testing principles, quality assurance, and the importance of delivering reliable software products. It also sparked my enthusiasm for ensuring software quality and efficiency.

In addition to testing, I bring a solid foundation in programming, having worked with languages such as Java and JavaScript, and frameworks like Spring Boot, Next.js, and DevOps tools. This technical background enables me to better understand the development process and communicate effectively with developers, which is a key strength in a testing role.

I am eager to apply my knowledge and grow as a software tester in a dynamic and innovative environment. I am particularly interested in contributing to a team where continuous learning, collaboration, and attention to detail are valued.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and motivation align with your needs. I am available at your convenience for an interview.

Sincerely,

Manirampa Pacifique
